DIABOLO PELLETS

The beginnings of the production of diablo pellets according to our method and our own technology date back to the 1960s. The improvement and achievement of today's top quality was achieved through many practical tests and, above all, through competitions of shooters and their experiences. The quality and characteristics are presented to you on the following pages. This year's novelty is the diablo *TDP* range for sports shooters produced with our precision and "SHARPNESS".

Die Anfänge der Diabolo-Geschosse nach unserem Verfahren und mit unserer eigenen Technologie reichen bis in die 1960er Jahre zurück. Die Verbesserung und die Erreichung der heutigen Spitzenqualität wurden durch zahlreiche Praxistests und vor allem durch Wettkämpfe und die Erfahrungen von Schützen erzielt. Auf den folgenden Seiten stellen wir Ihnen die Qualität und die Eigenschaften vor. Die diesjährige Neuheit ist das Diabolo *TDP* für Sportschützen, hergestellt mit unserer Präzision und »SCHÄRFE«.

Les débuts de la production de diablo selon notre méthode et notre technologie datent des années 1960. L'amélioration et l'obtention de la qualité exceptionnelle actuelle ont été rendues possibles grâce à de nombreux essais pratiques et, surtout, à l'expérience des tireurs. La qualité et les caractéristiques sont présentées sur les pages suivantes. La nouveauté de cette année est la série de diablo TDP pour les tireurs sportifs, fabriquée avec précision et notre « TRANCHANT ».
